

Stage 6 Textiles and Design

240-hour two-year master teaching programme | v1.0 current-contract candidate

Outcome boundary: The accepted Preliminary P outcomes and the HSC H outcomes remain distinct across the two-year sequence.

Complete official Preliminary and HSC outcomes

P1.1	describes the elements and principles of design and uses them in a variety of applications	P1.2	identifies the functional and aesthetic requirements and features of a range of textile items
P2.1	demonstrates the use of a variety of communication skills, including computer-based technology	P2.2	develops competence in the selection and use of appropriate manufacturing techniques and equipment
P2.3	manages the design and manufacture of textile projects	P3.1	identifies properties of a variety of fabrics, yarns and fibres
P3.2	justifies the selection of fabrics, yarns and fibres for end-uses	P4.1	identifies and selects textiles for specific end-uses based on analysis of experimentation
P5.1	examines the status of the Australian Textile, Clothing, Footwear and Allied Industries within the global context	P5.2	investigates the range of career options in design, consumerism, manufacturing and retail sectors of the Australian Textile, Clothing, Footwear and Allied Industries
P6.1	identifies and appreciates the factors that contribute to the quality and value of textiles in society	H1.1	critically analyses and explains the factors that have contributed to the design and manufacture of the Major Textiles Project
H1.2	designs a textile item or items that demonstrates an understanding of functional and aesthetic requirements	H1.3	identifies the principles of colouration for specific end-uses
H2.1	communicates design concepts and manufacturing specifications to both technical and non-technical audiences	H2.2	demonstrates proficiency in the manufacture of a textile item or items
H2.3	effectively manages the design and manufacture of a Major Textiles Project to completion	H3.1	explains the interrelationship between fabric, yarn and fibre properties
H3.2	develops knowledge and awareness of emerging textile technologies	H4.1	justifies the selection of fabric, yarn, fibre and fabric finishing techniques for specific end-uses
H4.2	selects and justifies manufacturing techniques, materials and equipment for a specific end-use	H5.1	investigates and describes aspects of marketing in the textile industry
H5.2	analyses and discusses the impact of current issues on the Australian textiles industry	H6.1	analyses the influence of historical, cultural and contemporary developments on textiles

Two-year planning and continuity

Year 11	Accepted 60-period / 120-hour Preliminary baseline	Year 12	HSC periods 61–120 / 120 indicative hours
Planning	2027 is a metadata planning basis only	Delivery	Actual delivery year and timetable: Teacher to confirm
Syllabus	Current 2013 syllabus only	Approval	Final school use or adoption: Teacher to confirm

Continuity map

Year 11 foundation	Preliminary learning	Year 12 application	HSC learning
Preliminary Design	elements/principles, functional and aesthetic requirements, communication and project management	HSC Design and MTP	inspiration, visual development, specifications, manufacture, evaluation and completion
Preliminary Properties	fibre, yarn and fabric structures, testing, properties and end-use selection	HSC Properties	innovations, enhancement, finishes and evidence-based performance justification
Preliminary Industry	industry overview, careers, quality and value	HSC Industry	appropriate technology, sustainability, current issues, marketplace and marketing
Preliminary projects	two teacher-bounded projects used to develop process and manufacturing capability	HSC Major Textiles Project	one individual MTP with supporting documentation and a textile item or items

Accepted Year 11 confirmations retained

ID	Owner	Teacher to confirm before use	Due before
TTC-01	Head Teacher / class teacher	Convert the 60 two-hour planning blocks to the school's actual period length and periods per fortnight.	Program issue and timetable entry
TTC-02	Textiles teacher / Head Teacher	Approve the Project 1 brief, pattern, materials, manufacturing sequence, equipment and local WHS controls.	Block 11
TTC-03	Textiles teacher / Head Teacher	Approve the Project 2 Bustier/Vest brief, pattern, materials, manufacturing sequence, equipment and local WHS controls.	Block 45
TTC-04	Textiles teacher / WHS owner	Approve each fabric-identification or textile-testing method, equipment, risk controls and supervision.	Blocks 41 and 45
TTC-05	Head Teacher / assessment coordinator	Supply the current Textiles assessment schedule and approved issue-ready notifications; the 2026 Year 11 booklet omits this course.	Formal assessment preparation or issue
TTC-07	Class teacher / Learning and Support	Confirm current resources, copying permissions, student adjustments and access arrangements for this cohort.	Course commencement and each affected activity
TTC-08	Head Teacher / class teacher	Approve this school-developed program and its local adaptations before implementation.	Program implementation

Year 11 periods 1–6

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
1	Site/theory	Design brief and requirements	Teach Module 1 section 'Design purpose, users and requirements'; students view the design lens and complete the 10-question check. Theory: Design purpose, users and requirements · Check: Check your understanding	Functional and aesthetic design; user, purpose, context and factors determining appropriate design.	Saved written response and Folio Card 1; P1.2
2	Site/theory	Elements of design	Teach 'Elements of design'; model evidence-based analysis; students complete the video prompt and 10-question check. Theory: Elements of design · Check: Check your understanding	Line/direction, shape/size, texture, colour/value applied across textile applications.	Written analysis and Folio Card 2; P1.1
3	Site/theory	Principles of design	Teach 'Principles of design'; compare examples; students complete the video prompt and 10-question check. Theory: Principles of design · Check: Check your understanding	Proportion, balance, rhythm, emphasis, contrast/harmony and unity.	Supported judgement and Folio Card 2; P1.1
4	Project/folio	Applied design analysis	Model the Design-analysis studio. Site link: Open linked course evidence	Describe and analyse elements and principles; identify functional and aesthetic requirements.	Completed activity plus Folio Cards 1-2; P1.1, P1.2
5	Site/theory	Focus areas and design types	Teach with the completed Module 2 theory, checks and applied-practice activity. Theory: Focus areas and design types · Check: Check your understanding	Functional and aesthetic design across apparel, furnishings, costume, textile arts and non-apparel.	Comparison notes; P1.1, P1.2
6	Site/theory	Factors affecting design	Model how environmental sustainability and manufacturing techniques shape a design response. Theory: Factors affecting design · Check: Check your understanding	Factors determining appropriate design; role of design in meeting functional and aesthetic requirements.	Evidence-based factor analysis; P1.2

Year 11 periods 7–12

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
7	Site/theory	Inspiration and development	Students compare inspiration sources and explain how a concept changes through feedback and constraints. Theory: Inspiration and design development · Check: Check your understanding	Generate, communicate, select and evaluate design ideas for a Preliminary textile project.	Annotated idea sequence; P1.1, P2.1
8	Project/folio	Project 1 design direction	Students record the user, purpose, requirements and one developed design direction in Folio Card 3. Site link: Open linked course evidence	Apply elements and principles; select, analyse and record design idea development.	Folio Card 3 checkpoint; P1.1, P1.2, P2.1
9	Site/theory	Manufacturing and pattern information	Teacher explains approved pattern information, symbols, measurements and quality checkpoints; use the completed site module. Theory: Manufacturing methods · Check: Check your understanding Teacher to confirm before use: TTC-02	Manufacturing methods; interpret, use and modify patterns for specific end-uses.	Pattern-reading check; P2.1, P2.2
10	Project/folio	Manufacturing plan	Students prepare a teacher-approved order of work and quality checkpoints without inventing technical details. Theory: Commercial pattern information · Check: Check your understanding Teacher to confirm before use: TTC-02	Outline and justify project development and management steps; communicate production information.	Approved plan and Folio Card 3; P2.1, P2.3
11	Practical	Approved technique sample 1	Teacher demonstrates the authorised technique and controls. Theory: Planning and quality checkpoints · Check: Check your understanding Teacher to confirm before use: TTC-02	Select and use manufacturing techniques appropriate to fabric and end-use.	Teacher-observed sample; P2.2
12	Practical	Approved technique sample 2	Students repeat or extend an authorised technique, check quality and record one improvement. Site link: Open linked course evidence Teacher to confirm before use: TTC-02	Develop competence with appropriate manufacturing techniques and equipment.	Improved sample and feedback record; P2.2, P2.3

Year 11 periods 13–18

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
13	Site/theory	Drawing and annotation	Teacher models object, fashion and production drawing conventions from authorised course sources. Theory: <u>Drawing and annotation</u> · Check: <u>Check your understanding</u>	Graphical communication: object, fashion and industry production drawing specifications.	Annotated communication sample; P2.1
14	Site/theory	Audience, purpose and medium	Compare verbal, written, graphical and digital methods; students select a method for a defined audience. Theory: <u>Production communication</u> · Check: <u>Check your understanding</u>	Criteria for effective verbal and written communication; communication-based technologies.	Method selection explanation; P2.1
15	Project/folio	Production communication	Students create a teacher-approved drawing or annotated specification for Project 1. Theory: <u>Digital and presentation methods</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: TTC-02	Develop competence in graphically communicating design ideas using appropriate media.	Communication evidence in Folio Card 3; P2.1
16	Project/folio	Design review	Run a short peer/teacher review. Site link: <u>Open linked course evidence</u> Teacher to confirm before use: TTC-02	Communicate, evaluate and modify design ideas; manage time and resources.	Approved change record; P2.1, P2.3
17	Project/folio	Project 1 readiness	Check approved brief, design evidence, pattern, resources and sequence. Theory: <u>Design refinement</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: TTC-02	Manage project development; evaluate ideas; plan time and resources.	Readiness checkpoint; P2.1, P2.3
18	Practical	Project 1 manufacture - stage 1	Teacher demonstrates the approved stage. Theory: <u>Project management</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: TTC-02	Project construction using appropriate methods, techniques and equipment.	Progress photo/sample and teacher checkpoint; P2.2, P2.3

Year 11 periods 19–24

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
19	Practical	Project 1 manufacture - stage 2	Students continue the approved sequence, check accuracy and respond to feedback. Theory: Evaluation and folio evidence · Check: Check your understanding Teacher to confirm before use: TTC-02	Apply manipulative skills and manage the textile project.	Technique evidence in Folio Card 4; P2.2, P2.3
20	Practical	Project 1 manufacture - stage 3	Students continue the approved sequence and record one quality issue or decision. Site link: Open linked course evidence Teacher to confirm before use: TTC-02	Use appropriate manufacturing techniques; manage time and resources.	Folio Card 5 change/checkpoint; P2.2, P2.3
21	Practical	Project 1 manufacture - completion	Students complete the approved construction sequence and carry out teacher-directed quality checks. Site link: Open linked course evidence Teacher to confirm before use: TTC-02	Complete and evaluate a Preliminary textile project using appropriate methods.	Completed product evidence; P2.2, P2.3
22	Practical	Project 1 evaluation evidence	Students photograph the authorised result, compare it with requirements and record a realistic improvement. Site link: Open linked course evidence Teacher to confirm before use: TTC-02	Evaluate ideas and project; substantiate conclusions with factual evidence.	Folio Card 6 evaluation; P1.2, P2.3, P4.1
23	Site/theory	Fibre classification	Teacher-led classification lesson using the approved properties booklet; use the completed site module. Theory: Fibre classification · Check: Check your understanding	Natural, regenerated and synthetic fibre types and classifications.	Classification map; P3.1
24	Site/theory	Molecular fibre structure	Explain monomer, polymer, amorphous and crystalline regions with verified diagrams. Theory: Molecular and morphological structure · Check: Check your understanding Teacher to confirm before use: TTC-07	Molecular structure and its contribution to fibre properties.	Labelled explanation; P3.1

Year 11 periods 25–30

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
25	Site/theory	Morphological fibre structure	Compare surface and cross-sectional features, staple, filament and multifilament forms. Theory: From fibre to textile · Check: Check your understanding	Morphological structure and its contribution to fibre properties.	Structure-property notes; P3.1, P3.2
26	Project/folio	Fibre-to-end-use reasoning	Students choose one verified fibre example and justify an end use using structure and properties. Site link: Open linked course evidence	Select fibres for specific end-uses using evidence about properties.	Folio Card 7 rationale; P3.1, P3.2
27	Site/theory	Natural cellulosic fibres	Teach cotton origin, structure, processing, properties and end-use from approved sources. Theory: Natural cellulosic fibres · Check: Check your understanding	Properties of natural cellulosic fibre; cotton classification and performance.	Cotton evidence table; P3.1
28	Site/theory	Natural protein fibres	Teach wool origin, structure, processing, properties and end-use from approved sources. Theory: Natural protein fibres · Check: Check your understanding	Properties of natural protein fibre; wool classification and performance.	Wool evidence table; P3.1
29	Site/theory	Manufactured fibres and blends	Compare viscose rayon, polyester, nylon, elastomeric and the required blends. Theory: Regenerated, synthetic and blended fibres · Check: Check your understanding	At least one regenerated, three synthetic fibres and two fibre blends.	Comparison check; P3.1, P3.2
30	Project/folio	Fibre selection	Students justify one natural and one manufactured fibre or blend for contrasting end uses. Site link: Open linked course evidence	Describe fibre properties and justify fibre selection for end-use.	Folio Card 7 comparison; P3.1, P3.2

Year 11 periods 31–36

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
31	Site/theory	Staple-spun and filament yarns	Compare staple-spun and filament construction and apply correct terminology. Theory: Staple-spun and filament yarns · Check: Check your understanding	Spun staple and filament yarn structure and characteristics.	Yarn classification notes; P3.1
32	Site/theory	Twist and spinning systems	Explain low/high twist and carded/combed or woollen/worsted distinctions. Theory: Twist and spinning systems · Check: Check your understanding	Twist level and spinning systems that affect yarn and fabric properties.	Structure-property explanation; P3.1
33	Site/theory	Textured and novelty yarns	Identify textured, slub, boucle and core-spun examples from verified sources or teacher samples. Theory: Textured and novelty yarns · Check: Check your understanding Teacher to confirm before use: TTC-07	Textured and novelty yarn structures and characteristics.	Identification evidence; P3.1
34	Project/folio	Yarn structure evidence	Students select one yarn structure and explain how it contributes to fabric behaviour. Site link: Open linked course evidence	Identify yarn characteristics that affect fabric properties.	Folio Card 7 yarn record; P3.1, P3.2
35	Site/theory	Yarn aesthetic and comfort properties	Teach how yarn structure affects appearance, handle and comfort. Theory: Yarn characteristics · Check: Check your understanding	Yarn aesthetic and comfort properties and their effect on fabric performance.	Cause-effect notes; P3.1
36	Site/theory	Yarn durability, strength and care	Compare durability, strength and care demands using verified examples. Theory: Structure-property relationships · Check: Check your understanding	Yarn durability, strength and care properties.	Comparison response; P3.1

Year 11 periods 37–42

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
37	Site/theory	Structure-property relationships	Model a chain from fibre to yarn structure to fabric performance and end use. Theory: End-use justification · Check: Check your understanding	Interrelationship of yarn structure, yarn properties and fabric performance.	Completed reasoning chain; P3.1, P3.2
38	Project/folio	Yarn end-use justification	Students justify a yarn selection for a specific textile end use using evidence. Site link: Open linked course evidence	Demonstrate understanding of yarn properties when selecting fabrics for end-use.	Folio Card 7 justification; P3.2
39	Site/theory	Woven structures	Teach warp, weft and selvedge, then compare plain, twill, satin, Jacquard, crepe and pile weaves. Theory: Woven structures · Check: Check your understanding	Woven fabric structure, terminology, types and classification.	Woven comparison; P3.1
40	Site/theory	Knitted structures	Teach course and wale, then compare the required knitted fabric types. Theory: Knitted structures · Check: Check your understanding	Single, double, tricot, pile, lace and net knitted structures.	Knitted comparison; P3.1
41	Site/theory	Non-woven structures	Compare felt, web and film structures and link construction to likely performance. Theory: Non-woven structures · Check: Check your understanding	Non-woven fabric structures, classification and properties.	Non-woven analysis; P3.1, P3.2
42	Practical	Fabric structure identification	Using teacher-approved samples and method, students identify structure and record evidence rather than appearance alone. Site link: Open linked course evidence Teacher to confirm before use: TTC-04	Identify fabric structures and describe properties affected by structure.	Folio Card 7 sample record; P3.1, P3.2

Year 11 periods 43–48

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
43	Site/theory	Properties and end use	Compare aesthetic, durability, comfort, dimensional stability and care properties. Theory: Properties and end use · Check: Check your understanding	Fabric and fibre properties used when selecting fabrics for specific end-uses.	Property-to-end-use table; P3.1, P3.2
44	Site/theory	Planning a fair textile test	Model an aim, variables, consistent method, results table and evidence-based conclusion without supplying an unapproved method. Theory: Planning a fair textile test · Check: Check your understanding Teacher to confirm before use: TTC-04	Use functional and aesthetic tests to record and evaluate results.	Fair-test plan; P4.1
45	Project/folio	Test plan and results structure	Students prepare Folio Card 8 fields and a teacher-approved recording format before testing. Theory: Recording and interpreting results · Check: Check your understanding Teacher to confirm before use: TTC-04	Plan experimental procedures; communicate and record information.	Approved aim/variables/results table; P2.1, P4.1
46	Practical	Authorised comparative textile test	Teacher demonstrates the approved method and controls. Site link: Open linked course evidence Teacher to confirm before use: TTC-04	Evaluate fabric properties using classroom testing procedures.	Results and observations in Folio Card 8; P3.1, P4.1
47	Project/folio	Evidence-based Project 2 choice	Students analyse authorised test results and justify one fabric, yarn or fibre selection for the confirmed project. Theory: Analysing experimental evidence · Check: Check your understanding Teacher to confirm before use: TTC-03	Make decisions about textiles using analysis of properties and experimental evidence.	Folio Cards 8-9; P3.2, P4.1
48	Practical	Project 2 manufacture - stage 1	Teacher demonstrates the approved Bustier/Vest stage. Theory: Fabric selection and design · Check: Check your understanding Teacher to confirm before use: TTC-03	Project 2 construction using techniques appropriate to fabric and end-use.	Progress evidence; P2.2, P2.3

Year 11 periods 49–54

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
49	Practical	Project 2 manufacture - stage 2	Students continue the approved sequence, check quality and record a supported decision. Theory: Project evidence and evaluation · Check: Check your understanding Teacher to confirm before use: TTC-03	Apply manipulative and management skills; communicate and record information.	Teacher checkpoint and Folio Card 9; P2.1, P2.2, P2.3
50	Practical	Project 2 completion and evaluation	Students complete the authorised item, collect product evidence and evaluate design, selection and manufacture. Site link: Open linked course evidence Teacher to confirm before use: TTC-03	Evaluate textile selection and project outcomes using factual evidence.	Completed Folio Card 9; P2.3, P3.2, P4.1
51	Site/theory	Industry development and sectors	Use current primary evidence to outline one ATCFAl sector and its development; use the completed site module. Theory: Industry development and sectors · Check: Check your understanding Teacher to confirm before use: TTC-07	Role of textiles; sectors; development across the 19th, 20th and 21st centuries.	Verified sector timeline; P5.1
52	Site/theory	Local and global context	Compare Australian industry participation with global markets and identify one current issue using dated sources. Theory: Local and global context · Check: Check your understanding Teacher to confirm before use: TTC-07	Contribution to local/global markets; issues, trends and future opportunities.	Source-based comparison; P5.1
53	Site/theory	Careers and training	Students investigate one current career pathway, required training and changing work context. Theory: Careers and training · Check: Check your understanding Teacher to confirm before use: TTC-07	Current and future employment and training opportunities across ATCFAl sectors.	Career profile for Folio Card 10; P5.2
54	Site/theory	Quality assurance and control	Compare design, trademarks, fabric quality, legislation, assurance checks and control measures. Theory: Quality assurance and control · Check: Check your understanding	Influences on quality; methods of quality assurance in the marketplace.	Quality case notes; P6.1

Year 11 periods 55–60

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
55	Site/theory	Roles and value	Examine manufacturer/consumer roles and perceived, cultural and economic value. Theory: Manufacturer and consumer roles · Check: Check your understanding	Factors contributing to quality and value across textile end-uses.	Comparative value analysis; P6.1
56	Project/folio	Industry quality/value case	Students build one sourced case analysis and record title, organisation, date and location. Theory: Perceived, cultural and economic value · Check: Check your understanding Teacher to confirm before use: TTC-07	Investigate quality assurance and discuss factors contributing to textile value.	Completed Folio Card 10; P6.1
57	Site/theory	Design retrieval and response planning	Retrieve Design concepts, diagnose gaps and plan one supported response using command terms. Theory: Knowledge retrieval · Check: Check your understanding Teacher to confirm before use: TTC-05	Design content from elements/principles through communication, manufacture and Project 1.	Low-stakes check and response plan; P1.1-P2.3
58	Site/theory	Properties retrieval and response planning	Retrieve fibre, yarn, fabric, testing and selection concepts; correct misconceptions. Theory: Command terms and response planning · Check: Check your understanding Teacher to confirm before use: TTC-05	Properties and Performance content; experimentation and end-use selection.	Low-stakes check and response plan; P3.1, P3.2, P4.1
59	Site/theory	Course synthesis	Students connect design, textile performance and industry/value in unfamiliar examples. Theory: Course synthesis · Check: Check your understanding Teacher to confirm before use: TTC-05	Integrated application of the three Preliminary areas of study.	Timed practice and feedback; P1.1-P6.1
60	Project/folio	Evidence and course review	Students check Folio Cards 1-10, identify incomplete evidence and prepare a personal revision priority list. Site link: Open linked course evidence Teacher to confirm before use: TTC-05	Evaluate and communicate project, experimental and industry evidence across the course.	Folio completeness record and next-step plan; P1.1-P6.1

Year 12 HSC boundary | periods 61–120

HSC component: These periods append the Year 12 course to the accepted Year 11 baseline. H outcomes, the MTP and current assessment boundaries remain HSC-only.

ID	Owner	Teacher to confirm before use	Due before
HSC-TTC-01	Head Teacher / class teacher	Treat 2027 as the planning basis only; confirm the actual delivery year, term dates and conversion of the 60 two-hour planning periods to the local timetable.	Before the programme is placed on the school timetable
HSC-TTC-02	Head Teacher / class teacher	Insert the current official assessment notifications: task numbers, dates, weightings, outcomes, criteria and submission or absence rules.	Before any formal assessment information is issued
HSC-TTC-03	Class teacher	Confirm current MTP checkpoints, display, packaging, certification, collection and submission arrangements.	Before the MTP completion and handoff block
HSC-TTC-04	Class teacher	Approve each student's focus area or project direction, equipment access, practical method and local WHS controls.	Before each affected practical period
HSC-TTC-05	Class teacher	Confirm the contemporary designer or case study, current sources and any updated local cultural-study requirements.	Before Modules 3 and 6 are taught
HSC-TTC-06	Head Teacher	Approve the Year 12 programme and the two-year master before school use or adoption.	Before school use or adoption

Year 12 periods 61–66

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
61	Site/theory	Course map and two-year bridge	Use Module 1 to distinguish Preliminary foundations from HSC applications. Theory: The HSC course map and two-year bridge · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	HSC course structure; continuity from Preliminary Design, Properties and industry learning; the MTP as a distinct HSC requirement. (Design 1 h + MTP 1 h)	Saved bridge map and retrieval note; H1.1, H2.3
62	Project/folio	MTP focus areas and evidence boundary	Teach the five focus areas and the relationship between the textile item or items and supporting documentation. Theory: MTP focus areas, requirements and evidence · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Individual MTP in apparel, furnishings, costume, textile arts or non-apparel; design, manufacture and management evidence. (MTP 2 h)	Provisional focus-area record and approval questions; H1.1, H2.3
63	Site/theory	From inspiration to a workable brief	Model the difference between inspiration, a design need and a workable brief. Theory: From design inspiration to a workable brief · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Relationship of inspiration to MTP design; functional and aesthetic requirements; feasible project planning. (Design 1 h + MTP 1 h)	Draft brief with functional/aesthetic requirements; H1.2, H2.1
64	Project/folio	Concept checkpoint and next actions	Students collate authorised initial evidence, identify gaps and create a bounded next-action plan. Site link: Open linked course evidence Teacher to confirm before use: HSC-TTC-01	Management of design and manufacture; communication of initial concepts; local project approval boundaries. (MTP 2 h)	Initial evidence inventory and next-action plan; H2.1, H2.3
65	Site/theory	Tracing one focus area over time	Teach students to build a selective historical timeline using dated, attributable evidence rather than a list of fashions. Theory: Tracing one focus area over time · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Historical design development within one focus area; evidence of change over time. (Design 2 h)	Annotated evidence timeline; H6.1
66	Site/theory	Factors shaping design change	Model a cause-and-effect chain linking social, economic, technological, political and cultural factors to specific design decisions. Theory: Factors that shape design change · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Factors contributing to historical textile design and manufacture; influence on design development. (Design 2 h)	Supported cause-and-effect chain; H6.1

Year 12 periods 67–72

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
67	Site/theory	Turning evidence into analysis	Students move from description to analysis by connecting a source, a design feature, the factor that shaped it and its consequence. Theory: Turning historical evidence into analysis · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Analysis of historical developments; application of influence to MTP design reasoning. (Design 1 h + MTP 1 h)	One structured historical analysis and MTP influence note; H1.1, H6.1
68	Project/folio	Historical influence translated, not copied	Students document how a historical influence changes function, form, material or construction in their concept. Site link: Open linked course evidence Teacher to confirm before use: HSC-TTC-01	Historical influence on the design and manufacture of the MTP; communication of design development. (MTP 2 h)	Before/after concept annotation; H1.1, H1.2, H2.1
69	Site/theory	Designer practice, inspiration and signature	Investigate the current teacher-selected designer or approved WWHS case study. Theory: Designer practice, inspiration and signature · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01, HSC-TTC-05	Contemporary designer practice, sources of inspiration and distinguishing design characteristics. (Design 2 h)	Sourced designer profile; H6.1
70	Site/theory	Internal and external success factors	Classify factors within and beyond a designer's organisation, then evaluate how two factors affect design, production or market success. Theory: Internal and external success factors · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01, HSC-TTC-05	Internal and external factors contributing to the success of a contemporary designer. (Design 2 h)	Two-factor evaluation; H5.1, H6.1
71	Site/theory	Designers and trends	Use dated examples to test whether a designer follows, adapts or shapes a trend. Theory: The relationship between designers and trends · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01, HSC-TTC-05	Relationship between contemporary designers and trends; application to personal design development. (Design 1 h + MTP 1 h)	Trend relationship paragraph and MTP influence record; H1.1, H6.1
72	Project/folio	Contemporary influence and concept refinement	Students refine one concept through a contemporary influence while retaining their own brief, user and purpose. Site link: Open linked course evidence Teacher to confirm before use: HSC-TTC-01, HSC-TTC-05	Factors contributing to MTP design; visual development and communication of concepts. (MTP 2 h)	Refined concept plus evidence-based annotation; H1.1, H1.2, H2.1

Year 12 periods 73–78

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
73	Site/theory	Colour principles for specific end use	Retrieve colour relationships, contrast, harmony, value and intensity. Theory: Colour principles for a specific end use · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Principles of colouration and selection of colour for specific end uses. (Design 2 h)	End-use colour rationale; H1.3
74	Site/theory	Printing and dyeing processes	Compare selected printing and dyeing processes by where colour is applied, the required control and the likely result. Theory: Printing and dyeing processes · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Principles and processes of fabric colouration through printing and dyeing. (Design 2 h)	Process comparison with end-use judgement; H1.3, H4.2
75	Site/theory	Planning controlled colouration evidence	Model a fair sample plan with one purposeful variable, consistent controls, labelled observations and an end-use criterion. Theory: Planning controlled colouration evidence · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Experimentation with colouration methods; selection for a specific end use. (Design 1 h + MTP 1 h)	Approved sample plan and predicted criterion; H1.3, H4.2
76	Practical	Authorised colour sample and decision	Under teacher direction, students produce or analyse an authorised colouration sample, record actual evidence and decide whether it suits the MTP. Site link: Open linked course evidence Teacher to confirm before use: HSC-TTC-01, HSC-TTC-04	Application and evaluation of colouration in the design and manufacture of the MTP. (MTP 2 h)	Labelled sample, observation and justified decision; H1.3, H4.2
77	Site/theory	Applique, embroidery and surface decoration	Compare how selected decoration techniques attach, build or alter a surface. Theory: Appliqué, embroidery and surface decoration · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Principles and use of applique, embroidery and other surface-decoration processes. (Design 2 h)	Technique-to-effect comparison; H4.2
78	Site/theory	Hand and machine technique decisions	Students analyse accuracy, control, repeatability, time, equipment and surface effect to choose between hand and machine approaches for a defined purpose. Theory: Hand and machine technique decisions · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Selection of decoration techniques, materials and equipment for a specific end use. (Design 2 h)	Decision matrix and written justification; H4.2

Year 12 periods 79–84

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
79	Practical	Authorised decoration sampling	Students follow the teacher-approved process, make comparable samples and record material, setting, sequence and observed result. Site link: Open linked course evidence Teacher to confirm before use: HSC-TTC-01, HSC-TTC-04	Experimentation and proficiency in manufacturing techniques relevant to the MTP. (MTP 2 h)	Labelled samples and process record; H2.2, H4.2
80	Project/folio	Comparing samples and selecting a method	Use functional, aesthetic and production criteria to compare samples. Theory: Comparing and evaluating samples · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Evaluation of techniques and materials for MTP design and manufacture. (MTP 2 h)	Comparative evaluation and MTP technique decision; H1.1, H4.2
81	Site/theory	Cultural context and respectful evidence	Introduce the WWHS Hmong culture study through sourced context and careful language. Theory: Cultural context and respectful evidence · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01, HSC-TTC-05	Cultural factors influencing textile design and production; textiles as forms of cultural expression. (Design 2 h)	Source-quality and respectful-language check; H6.1
82	Project/folio	Meanings, resources, skills and processes	Students examine how location, available resources, skill, social context and processes can shape textile production. Theory: Meanings, resources, skills and processes · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01, HSC-TTC-05	Relationship of cultural context, resources, skills and production processes to textile forms. (MTP 2 h)	Evidence map with uncertainty labels; H1.1, H6.1
83	Project/folio	Influence without appropriation	Model respectful influence through transferable design principles such as labour, layering, contrast or narrative structure—not copying culturally significant motifs. Theory: Design influence without appropriation · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01, HSC-TTC-05	Cultural influence on design; ethical and respectful development of an individual MTP. (MTP 2 h)	Respectful-influence rationale and revised concept; H1.1, H1.2, H6.1
84	Project/folio	Cultural evidence checkpoint	Students audit citations, image permissions, captions and wording in their influence evidence. Site link: Open linked course evidence Teacher to confirm before use: HSC-TTC-01, HSC-TTC-05	Communication and management of source-grounded MTP design development. (MTP 2 h)	Cultural-evidence audit and next action; H2.1, H2.3, H6.1

Year 12 periods 85–90

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
85	Project/folio	Generating ideas and selecting a direction	Generate meaningfully different ideas from the brief, then use explicit functional, aesthetic and feasibility criteria to select and defend a final direction. Theory: Generating ideas and choosing a final direction · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Visual design development, creativity and innovation in the MTP. (MTP 2 h)	Idea range, selection matrix and decision; H1.1, H1.2, H2.1
86	Project/folio	Functional and aesthetic analysis	Students unpack user, purpose, performance, comfort, appearance, style and context, then convert each requirement into a design response that can be observed or tested. Theory: Functional and aesthetic analysis · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Functional and aesthetic requirements of the MTP. (MTP 2 h)	Requirement-to-design-response table; H1.2
87	Project/folio	Drawings and manufacturing specifications	Develop production drawings and technical/non-technical specifications suited to the project. Theory: Drawings, specifications and time planning · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Communication of design concepts and manufacturing specifications. (MTP 2 h)	Current drawing/specification set; H2.1
88	Project/folio	Time, resources and decision management	Students convert the approved manufacture sequence into a living plan with dependencies, checkpoints and contingency actions. Site link: Open linked course evidence Teacher to confirm before use: HSC-TTC-01	Management of design and manufacture to completion. (MTP 2 h)	Versioned time/resource plan; H2.3
89	Project/folio	Building a fair and useful investigation	Frame an investigation around an actual MTP decision. Theory: Building a fair and useful investigation · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Investigation and experimentation supporting material, technique and process selection. (MTP 2 h)	Teacher-approvable investigation plan; H1.1, H4.1, H4.2
90	Practical	Recording samples, observations and results	Under local teacher direction, produce or analyse authorised samples. Theory: Recording samples, observations and results · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01, HSC-TTC-04	Accurate communication of experimentation and manufacturing evidence. (MTP 2 h)	Traceable sample/results record; H2.1, H2.2

Year 12 periods 91–96

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
91	Project/folio	Evaluation and justified design change	Compare evidence with the stated criteria, identify limitations and make a specific keep/change/reject decision. Theory: <u>Evaluation and justified design change</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01	Evaluation of experimentation and its contribution to MTP design and manufacture. (MTP 2 h)	Evidence-based design-change record; H1.1, H4.1, H4.2
92	Project/folio	Experimentation portfolio checkpoint	Students check that each experiment has a decision purpose, method, authentic evidence, evaluation and visible consequence. Site link: <u>Open linked course evidence</u> Teacher to confirm before use: HSC-TTC-01	Management and communication of MTP investigation evidence. (MTP 2 h)	Experimentation audit and next investigation; H2.1, H2.3
93	Site/theory	Innovation definitions, needs and drivers	Distinguish invention, innovation and improvement. Theory: <u>Innovation definitions, needs and drivers</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01	Nature and development of textile innovations and emerging technologies. (Properties 2 h)	Driver-to-innovation explanation; H3.2
94	Site/theory	Emerging fibres, yarns and fabrics	Compare current source-verified examples at fibre, yarn and fabric level. Theory: <u>Emerging fibres, yarns and fabrics</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01	Innovations in fibres, yarns and fabrics and their emerging applications. (Properties 2 h)	Structure-change-performance chain; H3.1, H3.2
95	Site/theory	Product, process and societal impacts	Evaluate an innovation from consumer, manufacturer, employee and environmental viewpoints. Theory: <u>Product, process and societal impacts</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01	Impacts of textile innovations on products, processes, people and environment. (Properties 1 h + MTP 1 h)	Multi-perspective impact evaluation; H3.2, H5.2
96	Project/folio	Innovation decision for the MTP	Students investigate whether one emerging material or process is feasible and appropriate for their actual end use, resources and evidence needs. Site link: <u>Open linked course evidence</u> Teacher to confirm before use: HSC-TTC-01	Selection and justification of materials, processes and equipment for the MTP. (MTP 2 h)	Feasibility and end-use decision; H1.1, H4.1, H4.2

Year 12 periods 97–102

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
97	Site/theory	Microfibres, bicomponent yarns and washable webs	Teach the specified innovation types through structure, manufacture, claimed performance and end use. Theory: <u>Microfibres, bicomponent yarns and washable webs</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01	Microfibres, bicomponent yarns and washable webs as textile innovations. (Properties 2 h)	Three-technology comparison; H3.1, H3.2
98	Site/theory	Retrieving structure-property relationships	Retrieve Preliminary fibre, yarn and fabric knowledge, then diagnose weak links in a structure-to-property explanation before applying it to an HSC innovation. Theory: <u>Revising structure–property relationships</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01	Interrelationship of fibre, yarn and fabric properties; continuity from Preliminary learning. (Properties 2 h)	Corrected structure-property reasoning chain; H3.1
99	Site/theory	Selecting performance for end use	Start with an end-use requirement, identify the required property, connect it to structure and compare trade-offs. Theory: <u>Selecting performance for end use</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01	Selection of textiles for performance in specific end uses. (Properties 1 h + MTP 1 h)	End-use comparison and provisional selection; H3.1, H4.1
100	Project/folio	MTP material evidence checkpoint	Students verify fibre, yarn, fabric and finish information for selected materials and identify evidence gaps. Site link: <u>Open linked course evidence</u> Teacher to confirm before use: HSC-TTC-01	Justification of textile selection for MTP functional and aesthetic requirements. (MTP 2 h)	Material evidence card and next test/source; H1.1, H4.1
101	Site/theory	Machinery and production technologies	Compare how selected production machinery and computer-supported systems change precision, speed, repeatability, labour or design communication. Theory: <u>Machinery and production technologies</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01	Developments in textile machinery and computer-supported production. (Properties 2 h)	Technology-impact comparison; H3.2
102	Site/theory	Seamless technology and construction change	Analyse how removing or relocating seams alters production, fit, comfort, waste and design possibilities. Theory: <u>Seamless technology and construction change</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01	Seamless technology and its effect on textile manufacture and performance. (Properties 2 h)	Process-performance explanation; H3.1, H3.2

Year 12 periods 103–108

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
103	Practical	Decorative enhancement, efficiency and quality	Under teacher direction, compare an authorised conventional and technology-supported enhancement pathway or sample. Theory: <u>Decorative enhancement, efficiency and quality</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01, HSC-TTC-04	Use of machinery and decorative technologies to enhance textile products. (MTP 2 h)	Comparative process evidence; H2.2, H4.2
104	Project/folio	Production technology decision	Students justify the selected equipment and manufacturing sequence for one MTP stage, including constraints, quality controls and an approved alternative if access changes. Site link: <u>Open linked course evidence</u> Teacher to confirm before use: HSC-TTC-01	Selection and justification of manufacturing techniques, materials and equipment for the MTP. (MTP 2 h)	Technology decision and contingency; H2.3, H4.2
105	Site/theory	Defining end-use requirements	Translate a use scenario into observable functional and aesthetic criteria before selecting a textile. Theory: <u>Defining end-use requirements</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01	Functional and aesthetic performance criteria for textile end uses. (Properties 2 h)	End-use criteria matrix; H1.2, H4.1
106	Site/theory	Finishes, performance and care	Compare selected finishes by treatment, intended effect, limitations and care implications. Theory: <u>Finishes, performance and care</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01	Fabric finishing techniques, performance enhancement and care requirements. (Properties 2 h)	Finish-performance-care chain; H3.1, H4.1
107	Site/theory	Fibre, yarn and fabric justification	Build a full justification from fibre properties through yarn and fabric structure to finish, end-use performance and trade-offs. Theory: <u>Evidence-based fibre, yarn and fabric justification</u> · Check: <u>Check your understanding</u> Teacher to confirm before use: HSC-TTC-01	Interrelationship of fibre, yarn, fabric and finish in selection for specific end uses. (Properties 2 h)	Evidence-based selection response; H3.1, H4.1
108	Site/theory	Properties synthesis under command terms	Students plan and write a supported response using an unfamiliar end-use scenario. Site link: <u>Open linked course evidence</u> Teacher to confirm before use: HSC-TTC-01, HSC-TTC-02	Integrated Properties and Performance content applied to HSC-style questions. (Properties 2 h)	Timed formative response and feedback; H3.1, H3.2, H4.1

Year 12 periods 109–114

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
109	Site/theory	Industry sectors and supply relationships	Map key Australian textiles, clothing, footwear and allied-industry sectors and the relationships among design, supply, manufacture, retail, service and end users. Theory: Industry sectors and supply relationships · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Structure and sectors of the Australian textile industry and their relationships. (Industry 2 h)	Source-dated sector map; H5.2
110	Site/theory	Marketplace, product development and marketing	Apply product, price, place and promotion to an approved textile case. Theory: Marketplace, product development and marketing · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Textile marketplace, target markets, product development, marketing mix and product life cycle. (Industry 2 h)	Marketing strategy analysis; H5.1
111	Site/theory	Workplace, consumer and global links	Analyse how global supply, consumer demand, skills and workplace decisions interact. Theory: Workplace, consumer and global links · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Globalisation, skills, consumer demand and changing industry relationships. (Industry 1 h + MTP 1 h)	Relationship analysis and MTP implication; H5.1, H5.2
112	Project/folio	MTP product communication and label planning	Students draft product information appropriate to user and end use, then flag every legal, fibre-content, care or school requirement that needs current teacher/source confirmation. Site link: Open linked course evidence Teacher to confirm before use: HSC-TTC-01	Communication of the MTP to technical and non-technical audiences; marketplace considerations. (MTP 2 h)	Draft product communication with confirmation flags; H2.1, H5.1
113	Site/theory	Appropriate textile technology	Judge whether a technology is appropriate by matching scale, skill, cost, maintenance, resource use, local context and intended benefit—not by assuming newer is better. Theory: Appropriate textile technology · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Appropriate technology, resources, alternatives and limitations in textile production. (Industry 2 h)	Context-based technology judgement; H5.2
114	Site/theory	Sustainability across a product life cycle	Trace material sourcing, manufacture, distribution, use, care, repair and end-of-life. Theory: Environmental sustainability across a product life cycle · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Environmental sustainability, recycling, pollution and product life-cycle considerations. (Industry 2 h)	Life-cycle hotspot analysis; H5.2

Year 12 periods 115–120

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
115	Site/theory	Social, consumer and industry issues	Use a current dated source to analyse one issue from more than one stakeholder perspective. Theory: Analysing social, consumer and industry issues · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01	Impact of current social, consumer and industry issues on the Australian textiles industry. (Industry 1 h + MTP 1 h)	Multi-stakeholder issue analysis; H5.2
116	Project/folio	MTP sustainability and resource evaluation	Students evaluate one material, process or care decision across the relevant life-cycle stages and record a practical keep/change/mitigate action. Site link: Open linked course evidence Teacher to confirm before use: HSC-TTC-01	Factors contributing to MTP design and manufacture; justified material/process choices. (MTP 2 h)	Bounded sustainability evaluation; H1.1, H4.1, H4.2
117	Project/folio	MTP completion and evidence handoff	Students reconcile the approved item or items, supporting-documentation evidence and remaining teacher-confirmed submission actions. Theory: MTP completion and evidence handoff · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01, HSC-TTC-03	Completion and management of MTP design and manufacture; communication of evidence. (MTP 2 h)	Completion audit and teacher-check list; H1.1, H2.1, H2.2, H2.3
118	Site/theory	Command terms and response planning	Retrieve design content while practising analyse, explain, justify and evaluate. Theory: Command terms and response planning · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01, HSC-TTC-02, HSC-TTC-03	Design content integrated through HSC response planning; MTP factors and influences. (Design 1 h + MTP 1 h)	Annotated response plan and MTP reflection; H1.1, H1.2, H1.3, H6.1
119	Site/theory	Properties synthesis and misconception repair	Retrieve structure-property, innovation, finish and end-use selection concepts. Theory: Whole-course synthesis and revision · Check: Check your understanding Teacher to confirm before use: HSC-TTC-01, HSC-TTC-02, HSC-TTC-03	Integrated Properties and Performance content for HSC preparation. (Properties 2 h)	Corrected reasoning chain and timed response; H3.1, H3.2, H4.1
120	Site/theory	Industry and whole-course synthesis	Connect marketing and current issues to an unfamiliar textile case, then build a personal revision plan across Design, Properties, industry and MTP learning. Site link: Open linked course evidence Teacher to confirm before use: HSC-TTC-01, HSC-TTC-02, HSC-TTC-03	Integrated application of HSC Areas of Study and course outcomes. (Industry 2 h)	Industry response plus evidence-based revision plan; H5.1, H5.2
